# Communications in Mathematical Sciences

## A New Applied Mathematics Journal by International Press

## Special Features

- **Scope**: CMS covers modern applied mathematics in modeling, analysis and computations of problems that arise in physical, biological and financial applications
- **Speed**: Most articles will appear in SIX months from the submission date; fast communications will appear in THREE months
- **Style**: We feature original research papers, review and expository arti cles, fast communications, and descriptions on movies based on numerical simulations

To contribute articles, please send postscript or PDF files to : **jcms@math.wisc.edu**

To subscribe, please email to: **journals@intlpress.com**

## Sample Articles:

- *Harmonicity up to Rearrangement and Isothermal Gas Dynamics* - Yann Brenier
- *The Heterogeneous Multi-scale Methods* - Weinan E & Bjorn Engquist
- *Singularity Formation and Instability in the Unsteady Inviscid & Viscous Prandtl Equations* - Lan Hong & John Hunter
- *A Level Set Method for the Computation of Multivalued Solutions to Quasilinear Hyperbolic PDE's & Hamilton-Jacobi Equations* - Shi Jin & Stanley Osher
- *Numerical Techniques for Multi-scale Dynamical Systems with Stochastic Effects* - Eric Vanden-Eijnden
- *Hydrodynamic Model for Charge Carriers* - Isabelle Choquet, Pierre Degond & Christian Schmeiser
