

The Asian Journal of Mathematics

A Journal on Pure and Applied Mathematics by International Press
(ISSN: 1093-6106)

The Asian Journal of Mathematics (AJM) provides a forum for the developments of Mathematics, and aims to stimulate mathematical research in the Asian region. AJM publishes original research papers and survey articles in all areas of pure mathematics and theoretical applied mathematics.

To contribute articles, please send LATEX or AMSTEX files to:

ajm@ims.cuhk.edu.hk

Subscription Prices for 2003 & 2004 are only **\$271 & \$279!**

To subscribe, please email to: journals@intlpress.com

Sample Articles

- *The Monodromy Pairing* — Robert F. Coleman
- *Density of Rational Points on Elliptic K3 Surfaces* — F. A. Bogomolov and Yu.
- *Tschinkel Anomalies in String Theory with D-Branes* — Daniel S. Freed and Edward Witten
- *Deforming Calabi-Yau Orbifolds* - Dominic Joyce
- *Comparison of Algebraic and Symplectic Gromov-Witten Invariants* — J. Li and G. Tian
