

# Methods and Applications of Analysis

**Methods and Applications of Analysis** (ISSN: 1073-2772), is published by **International Press**. MAA consists of four issues in one volume annually. All original papers that give new directions of analysis are welcome!

To submit articles, please send your manuscripts, preferably in TEX files, to:

[maaedit@ims.cuhk.edu.hk](mailto:maaedit@ims.cuhk.edu.hk)

The subscription prices for 2003/ 2004 are only **\$323/ \$333!**

To subscribe, please send email to:

## Aims and Scope

Methods and Applications of Analysis publishes high quality papers in the board area of pure and applied analysis. The applications of the subject to different branches of natural sciences and engineering will be welcome.

MAA deals with the following subjects in Mathematics: mathematical physics, mathematical theory of continuum mechanics, differential and integral equations, dynamical systems, stochastic analysis, numerical analysis, asymptotic analysis, special functions, algebraic analysis of differential or integral equations.
