

Current Developments in Mathematics 1998

Table of Content

1. Mirror Symmetry: A Brief Review of the First 10 Years - B.R. Greene
2. Mirror Principle: A Survey - Bong H. Lian, Kefeng Liu, and S.-T. Yau
3. Developments in Symplectic Topology - P.B. Kronheimer
4. O-minimal Structures and Real Analytic Geometry - Lou Van Den Dries
5. Asymptotic Solutions to Dynamics of Many-Body Systems and Classical Continuum Equations - Horng-Tzer Yau
6. Geometric and Ergodic Theory of Hyperbolic Dynamical Systems - Lai-Sang Young

Editors: B. Mazur, D. Jerison, W. Schmid, I. Singer, D. Stroock and S.T. Yau
 ISBN: 1-57146-077-2
 Year Published: 1998
 Binding: Hardcover
 Page: 278 pp
 Price: \$65, Sales: **\$48**

Current Developments in Mathematics 1999

Table of Contents

1. Recent Proofs of the Riemannian Penrose Conjecture - Hubert Bray and Richard Schoen
2. Recent Progress in Sphere Packing - J. H. Conway, C. Goodman-Strauss, and N.J. A. Sloane
3. A report on the proof of the Langlands conjecture for $GL(N)$ over p -adic fields - Guy Henniart
4. The Langlands Correspondence for Function Fields following Laurent Lafforgue - Gerard

Editors: B. Mazur, D. Jerison, W. Schmid, I. Singer, D. Stroock and S.T. Yau
 ISBN: 1-57146-043-8
 Year Published: 1999
 Binding: Softcover
 Page: 132 pp
 Price: **\$20** (softcover)

Current Developments in Mathematics 2000

Table of Contents

1. Reflection Groups, Braid Groups, Hecke Algebras, Finite Reduction Groups - Michel Broue
2. Stochastic Hydrodynamics - Weinan E
3. Arithmetic Progressions in Sparse Sets - W.T. Gowers
4. The topology of Real Algebraic Varieties - Janos Kollar
5. Scaling limits of random processes and the outer boundary of Planar Brownian motion - Oded Schramm

Editors: G. Lustig, B. Mazur, D. Jerison, A.J. de Jong, W. Schmid, and S.T. Yau
 ISBN: 1-57146-079-9
 Year Published: 2000
 Binding: Hardcover
 Page: 253 pp
 Price: \$65, Sales: **\$48**

Current Developments in Mathematics 2001

Table of Contents

1. Recent Developments in Algebraic K-theory - Gunnar Carlsson
2. K-Theory in Quantum Field Theory - Daniel S. Freed
3. The Mathematical Structure of the Second Law of Thermodynamics - Elliott H. Lieb & Jakob Yngvason
4. The Ground State of the Bose Gas - Elliott H. Lieb, Jan Philip Solovej, Robert Seiringer, and Jakob Yngvason
5. Elliptic curves, L-functions, and CM-points - Shou-wu Zhang

Editors: G. Lustig, B. Mazur, D. Jerison, A.J. de Jong, W. Schmid, and S.T. Yau
 ISBN: 1-57146-079-9
 Year Published: 2000
 Binding: Hardcover
 Page: 253 pp
 Price: \$65
