

## Surveys in Differential Geometry (Vol. I — VII)

### Description

As an annual supplement to the Journal of Differential Geometry, Surveys in Differential Geometry focuses on specific topics of current interest. Survey articles review the current state of knowledge relating to particular questions and present new integrative results. Surveys in Differential Geometry provides both a large number of insightful and informative articles and an indispensable tool for keeping up with the wide variety of researches in Differential Geometry.

Special Promotion: \$300 for the complete set of *Surveys in Differential Geometry*, including 8 issues (Volume 1 to 8)
